DETAILED ACTION

1. Claims 1-2 and 4-6 are pending
2. Applicant's cancellations of claims 3 and 7-8, and amendments to claim 1 filed on 9/22/08 are acknowledged.

Claims 1-2 and 4-6 are examined on the merits.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. The rejections and objections that are not recited in this Office Action are considered as being withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-2 and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the synonymous condons " in part (a). There is insufficient antecedent basis for this limitation in the claim.

New Matter

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-2 and 4-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims have been amended to recite "codons with a usage frequency of 0-10%". Applicants fail to point to support for the phrase in the instant specification. Upon a cursory search of the specification, support could not be found. Applicants are required to point to support for "codons with a usage frequency of 0-10%" or to amend the claims to delete the NEW MATTER.

Scope of Enablement

7. Claims 1-2 and 4-6 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method for breeding transgenic tobacco plants with high antiviral property against PVX by transforming the tobacco plants with a recombinant vector in which the coat protein gene of PVX is mutated by replacing some codons with synonymous codons with usage frequency of $0-10 \times 10^{-3}$, does not reasonably provide enablement for any synonymous codon. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims, for the reasons of record stated in the Office action mailed June 24, 2007. Applicants traverse in the paper filed September 22, 2008. Applicants' arguments have been fully considered but were not found persuasive.

Applicants argue that the claims have been amended to overcome the rejection (response, last paragraph of page 2).

The Office contends that the amended claim still reads on using any synonymous codon rather than the synonymous codons with usage frequency of $0-10 \times 10^{-3}$. The invention is to change the codons of the coat protein gene of PVX to those synonymous but rare codons. Therefore, those synonymous and regular codons are not enabled for the invention. Still further, claim 1 is amended to recite "codons with a usage frequency

of 0-10%", however, the codons with a usage frequency of 10% are not considered as rare codons according to Table 1 on page 5 of the specification.

Summary

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
